

Pollinate Plus

leading edge technology for increasing bee activity and attraction.

Pollinate Plus

Extended release bee attractant system.

Pollinate Plus can not only enhance crop production, but also attract other native species of pollinators to the area. They also indicate that honeybee behavior and foraging area may be enhanced as well. Pollinate Plus maximizes the release of these attractants giving the product longer life in the field, while protecting and containing the active ingredients in an easy to apply material.

Pollinate Plus is an innovative inert polymer system using organics. It is unique in that it is applied once a year right before pollination begins and is an extended release pollinator attractant.

Benefits of using Pollinate Plus
